

▼ Shown from left to right: P77, P80, P84, P801, P39

- Reduced handle effort and ergonomic grip for less operator fatigue
- Two-speed operation for fast and easy operation (except P39)
- Vent free reservoir eliminates spills
- Quick grip handle allows for easy transport
- Integral reservoir over-pressurization protection
- All steel construction, chrome plated plunger and wiper system for durable, long lasting performance
- 4-way valving on P84 and P464 for operation of double-acting cylinders.

▼ In the absence of a power supply, the P80 Hand Pump offers a powerful solution. Alternatively, a battery-powered cordless pump can be used.

The Solution for Tough Jobs

Two-Speed Pumps

Recommended for applications where cylinder plunger must advance rapidly to load contact, and applications where greater oil capacities are required, such as multiple cylinder hook-ups.

Foot Pump Conversion Kits

Convert your P39, P77, P80 or P801 to foot power with the **PC11** Kit. Includes instructions for easy conversion.

GA45GC Gauge Adaptor

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 150

4-Way Control Valve

P84 and **P464** feature a manual 4-way control valve, designed for use with one double-acting or two single-acting cylinders. For system

set-up information:

Page: 404

Pump Type	Usable Oil Capacity (cm ³)	Model Number	Pressure Rating ²⁾ (bar)		Oil Displacement per Stroke (cm ³)		Max. Handle Effort (kg)

P-Series, Lightweight Hand Pumps

ENERPAC 

▼ Shown from top to bottom: P802, P842, P202, P142

- Lightweight and compact design
- Durable glass-filled nylon reservoir and nylon encapsulated aluminium pump base for maximum corrosion resistance
- Two-speed operation reduces handle strokes by as much as 78% over single-speed pumps
- Lower handle effort to minimize operator fatigue
- Integral 4-way valve on P842 for operation of double-acting cylinders
- Handle lock and lightweight construction for easy carrying
- Large oil capacities to power a wide range of cylinders or tools
- Non-conductive fiberglass handle for improved operator safety
- Internal pressure relief valve for overload protection.

▼ Cylinder-pump set SCR254H used to support the construction while monitoring pressure and load with the gauge.

Exclusively from Enerpac

Cylinder Matching Chart

For help in selecting the correct hand pump for your application, please refer to the Cylinder Matching Chart located in the 'Yellow Pages'.

- These are just a few basic system possible with HI-POWER hydraulic components.
- Countless applications are possible: In presses, for lifting or jacking applications or in production or maintenance setups.
- The pump shown is a typical hydraulic unit. Electric or air driven pump are available.

HI-POWER Cylinder
Applies hydraulic force.

HI-POWER Pump
Provides hydraulic flow.

HI-POWER Hose
Transports hydraulic fluid.

HI-POWER Quick Coupling
“Hose half” and “cylinder half” couplings are used for quick connection and fluid flow check when separated.

HI-POWER Gauge
To Monitor pressure of the cylinder circuit.

HI-POWER Gauge Adaptor
For quick and easy gauge installation.

HI-POWER Manifold
Allows distribution of hydraulic fluid from one power source to several cylinder.

HI-POWER Needle Valve
Regulates the flow of hydraulic fluid to or from the cylinder such as V80.

HI-POWER Safety Holding Valve
Controls load descent in lifting applications such as V-66.

HI-POWER Control Valve
4-way direction by double-acting
3-way direction by single-action.

Basic System Set-up

Single-acting push application

Two point lifting set-up using single-acting cylinder

Double-acting cylinder set-up

Two point set-up with Double-acting cylinder

Single-acting push application

Selection

Flow = is created by the pump

Pressure = is created by resistance to flow

This resistance is usually the result of a load.

$$\text{Force (metric tons)} = \frac{\text{Cyl. Eff. Area (cm}^2\text{)} \times \text{Working pressure (Hydraulic Pump) (bar / kgf/cm}^2\text{)}}{1000\text{kg}}$$

$$\text{Extended Height (in)} = \text{Cyl. Stroke (in)} + \text{Cyl. Collapsed Height (in)}$$

$$\text{Cyl. oil Cap. (in}^3\text{)} = \text{Cyl. Eff. Area (in}^2\text{)} \times \text{Cyl. Stroke (in)}$$

$$\text{Usable oil (system) (in}^3\text{)} = \text{Cyl. Eff. Cap. (in}^3\text{)} \times \text{Quantity of Cyl. In system}$$

$$\text{Speed (Cyl. Plg.) (Sec/in)} = \frac{\text{Cyl. Eff. Area (in}^2\text{)}}{\text{Pump flow per minute (in}^3\text{ / min)}} \times 60\text{sec}$$

H-Series, High Pressure Hydraulic Hoses

▼ Shown from top to bottom: HC-7206, HC-7210 and HC-9206

- Crimped-on rubber strain relief for improved life and durability on all models.

Thermo-plastic Hoses (700-Series)

- For demanding applications, featuring a 4:1 design factor
- Maximum working pressure of 700 bar
- Two layers of steel wire braids
- Outside jacket is polyurethane, to provide maximum abrasion resistance
- Exhibits low volumetric expansion under pressure to enhance overall system efficiency

Heavy-duty Rubber Hoses (900-Series)

- The most complete offering: 35 models up to 15 metres in length
- Rubber coated with two layers of steel wire braids
- Designed to comply with Material Handling Institute IJ-100 hose specification
- Flexible, with little “memory”, is the best choice for long hose runs.

▼ To prevent back pressure and to increase cylinder retraction speed, when using long hoses with single-acting cylinders, the Enerpac HC-7300-Series of hoses with increased internal diameter is the best choice.

Emphasize Safety and Quality

To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

WARNING !

- Do not exceed 700 bar maximum pressure.
- Do not handle hoses which are under pressure.

More safety instructions in our ‘Yellow pages’.

High Pressure Hydraulic Hoses

Hose Oil Capacity

When using greater hose lengths, it is sometimes necessary to fill the pump reservoir after filling the hoses.

To determine the hose oil capacity, use the following:

For 6,4 mm inside diameter hoses:

Capacity (cm³) = 32,17 x Length (m)

For 9,7 mm inside diameter hoses:

Capacity (cm³) = 73,90 x Length (m)

H700 H900 Series

Inside Diameter:

6,4 - 9,7 mm

Hose Length:

0,6 - 15 m

Maximum Operating Pressure:

700 bar

GA-45GC

▼ Shown from left to right: G4089L, G2535L, G4040L

Glycerine-Filled (G-Series)

- Dual scale reading calibrated in bar and psi
- All pressure sensing parts sealed and dampened by glycerine for long life
- Includes safety blow-out disk and pressure equalizing membrane
- Gauge snubbers or needle valves recommended for high-cycle applications.

High-Cycle Dry Gauges (H-Series)

- Dual scale reading calibrated in bar and psi
- Ideal for use in many applications, specifically for high-cycle and harsh environments
- Gauge snubbers or needle valves recommended to shut-off gauge when not in use.

Visual Reference of System Pressure

Gauge Adaptor Assembly

45° Angled gauge adaptor **GA45GC** for easier gauge reading.

Page: 150

Gauge Adaptor

For easy gauge installation into almost any system, Enerpac offers a complete line of gauge adaptors.

Page: 151

Snubber Valve V91

Infinitely adjustable for metering oil out of a gauge. The V91 Snubber Valve is also suitable as a shut-off valve to protect the gauge during

high cycle applications.

Page: 152

◀ When lifting or pressing, always use a gauge. A gauge is your 'window' to the system. It lets you see what's going on.

Hydraulic Pressure Gauges

CAUTION! When lifting or pressing, always use a gauge

Do not override factory setting of relief valves. Always use a gauge to check system pressure. A gauge is your 'window' to the system. It lets you see what's going on. See our Safety Instructions.

Pressure Gauge 700 Bar, 10000 psi
Glycerine filled pressure gauge 1000 Bar
Material : SUS stainless steel

HG-2535L

Applications

- For measuring points with high dynamic pressure loads or vibrations

FOR Hydraulic HI-POWER System Max. Pressure 1000 Bar , 14500 psi

Special features

Vibration and shock resistant
 Especially sturdy design
 Scale ranges up to 0 700 bar
 & 0 10000 psi

Description

MODEL : HG-2535L

Nominal size in mm

FACE DIA : 2 1/2 inch (63.5 mm.)

Accuracy

+/- 1%

Scale ranges

BAR : 0 200 bar 700 bar
 PSI : 0 5000 psi 10000 psi

MODEL : HG-2535L Dimensions in mm

Lower mount (LM)

Process connection

SUS Stainless Steel Thread

lower mount (LM)

CONNECTION PORT SIZE : 1/4 NPT

Permissible temperature

Ambient: -20 ... +60 °C

Medium: +60 °C maximum

Temperature effect

When the temperature of the measuring system deviates from the reference temperature (+20 °C):

Max. ±0.4 %/10 K of the span

Ingress protection

IP 65 per EN 60529 / IEC 529

Refer to ASME-B40.100, EN837-2

HI-POWER® Gauge Adaptor 700 Bar

HI-POWER HI-Quality # HGA-4 NEW
 Durable&Easy to mounting for pressure gauge
 HI-POWER Female ports for hose or coupler ,
 male screw port for pump or cylinder ,
 upper port for gauge connection.

HGA-4 NEW

HI-POWER®

Safety and Quality

To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

WARNING !

- Do not exceed 10,000 psi maximum pressure.
- Do not handle hoses which are under pressure.

More safety instructions in our 'Yellow pages'.

Page: 400

- Vinyl strain relief guard on both ends of hose to improve life and durability on all models
- Maximum working pressure of 10,000 psi.

Thermo-Plastic Safety Hoses (H700-Series)

- For demanding applications, featuring a 4:1 safety factor
- Outside jacket is polyurethane, to provide maximum abrasion resistance
- Exhibits low volumetric expansion under pressure to enhance overall system efficiency.

Heavy-Duty Rubber Hoses (H900-Series)

- The most complete offering: 35 models up to 50 feet in length
- Rubber coated with two layers of steel wire braids
- Designed to comply with Material Handling Institute IJ100 hose specification
- Flexible, with little "memory", is the best choice for long hose runs.

▼ To prevent back pressure and to increase cylinder retraction speed, when using long hoses with single-acting cylinders, the Enerpac HC7300-Series of hoses with increased internal diameter is the best choice.

High-Pressure Hydraulic Hoses

Hose Oil Capacity

When using greater hose lengths, it is sometimes necessary to fill the pump reservoir after filling the hoses.

To determine the hose oil capacity, use the following:

For 0.25" internal diameter hoses:

Capacity (in³) = .59 x Length (ft)

For 0.38" internal diameter hoses:

Capacity (in³) = 1.36 x Length (ft)

H700 H900 Series

Internal Diameter:

0.25 - 0.38 inch

Length:

2 - 50 feet

Maximum Operating Pressure:

10,000 psi

For USA & Latin-America only

* For technical information on couplers see next page.

GA45GC Gauge Adaptor

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 150

Torque Wrench Hoses

Use Enerpac twin safety hoses with double-acting wrenches to ensure the integrity of your hydraulic system.

Page: 255

Fittings

For additional fittings see the fitting page of the System Components section.

Page: 141

Premium Hydraulic Oil

Use only genuine Enerpac Hydraulic Oil. The use of any other fluid will render your Enerpac warranty null and void.
